Outstanding Features with Built-In Quality

Up to 4 Multi-Handset Capability/Up to 4-Way Conference Calling
Even during a conversation with an incoming caller, you can call up the base unit handset, portable handset, or speakerphone on the base unit to have a 4-party conversation at the same time.

Talking Caller ID*
When a call comes in, the phone doesn't just let you see who is calling, it actually tells you who is calling. Using text to speech technology the caller's name is announced in between rings if Caller ID information is available.

50-Station Caller ID Memory*
The unit will retain the most recent 50 numbers from the Caller ID memory, providing direct call back capability.

50-Station Phone Book/Phone Book Copy
The handset can store up to 50 names and phone numbers in its phone book. You can make a call by selecting a name or number from the phone book, and copy phone book items from one handset to another.

Voice Enhancer Technology
Generates band signals above 3.5 KHz and below 300 Hz, extending the frequency bandwidth similar to that of the original voice. Voices are crisp, clear, and easy to understand.

Dual Digital Duplex Speakerphones (Base/Handset)
Helps reduce the echo and drop out effect found in regular speakerphones for a more natural-sounding conversation on both the base unit and handset.

Voice Paging
The base unit user can make a voice announcement that is heard through the speakers of all handsets.

Intelligent Antenna (Handset)
The tip of the antenna lights up to tell you that there is an incoming call or voice message.
